A silver-haired anime warrior on a neon-lit rooftop at night, dynamic action pose, cel-shaded, vibrant colors, detailed cityscape background.
Anime character portrait
Chibi / kawaii style
Fantasy anime scene
Generate ↑ 16

the tool

Generate anime and manga-style art from a text prompt with GPT Image 2 or Nano Banana 2, each with a clear credit cost.

How to Generate Anime Art in 3 Steps

From a written idea to a finished anime illustration, the tool turns your prompt into art in three steps — no drawing skills or design software involved.

1

Describe your anime idea

Write a prompt for the tool: the character, hair and eye color, outfit, pose, and art style (cel-shaded, chibi, shoujo, shonen, or fantasy). The more specific your description, the closer the first result lands.

2

Pick a model

Choose GPT Image 2 or Nano Banana 2 and review its credit cost before you generate. Each model has its own strengths, so switching models is an easy way to change the feel of the anime art.

3

Generate and refine

Generate the image, then adjust the prompt and regenerate until the anime look matches what you pictured. Refining wording — not redrawing — is how you dial the tool in on the exact character you want.
